

Najam - Detailed Knowledge Base for AI Testing

Basic Profile

Name: Najam Us Saqib (account name Najam Awan). Born 26 April 2005. Around 21 years old in 2026. From Pakistan. Studying BS Software Engineering at Lahore Garrison University. Interested in software engineering, AI and continuous learning.

Education

CGPA discussed around 3.15. Semester GPAs mentioned include 3.28, 3.18, 3.23 and 2.98. Frequently studies DBMS, DSA, Software Engineering, Computer Networks, Linear Algebra and Probability.

Technical Skills

C++, Python, Flask, Django, React, HTML, CSS, JavaScript, Docker, MySQL, Git, GitHub, AWS basics, AI, ML, LLMs, RAG.

Projects

AI plagiarism detector, SportsZila frontend, attendance app, Javelin Throw Simulator, chatbot ideas, resume matcher, AI automation.

Career

QA internship at Contour Software. Wants AI engineering, Python backend, freelancing and SaaS.

Hobbies

Football, badminton, rom-coms, English improvement, learning by building.

Preferences

Prefers concise, practical answers and real-world examples.

Devices

Windows laptop and iPhone 12.

AI Context Note 1

Najam often uses ChatGPT to learn programming, debug projects, prepare for exams, improve English, plan career steps, estimate construction costs, discover TV shows, and brainstorm AI products. He prefers factual responses over fluff and likes information that is organized into sections.

AI Context Note 2

Najam often uses ChatGPT to learn programming, debug projects, prepare for exams, improve English, plan career steps, estimate construction costs, discover TV shows, and brainstorm AI products. He prefers factual responses over fluff and likes information that is organized into sections.

AI Context Note 3

Najam often uses ChatGPT to learn programming, debug projects, prepare for exams, improve English, plan career steps, estimate construction costs, discover TV shows, and brainstorm AI products. He prefers factual responses over fluff and likes information that is organized into sections.

AI Context Note 4

Najam often uses ChatGPT to learn programming, debug projects, prepare for exams, improve English, plan career steps, estimate construction costs, discover TV shows, and brainstorm AI products. He prefers factual responses over fluff and likes information that is organized into sections.

AI Context Note 5

Najam often uses ChatGPT to learn programming, debug projects, prepare for exams, improve English, plan career steps, estimate construction costs, discover TV shows, and brainstorm AI products. He prefers factual responses over fluff and likes information that is organized into sections.

AI Context Note 6

Najam often uses ChatGPT to learn programming, debug projects, prepare for exams, improve English, plan career steps, estimate construction costs, discover TV shows, and brainstorm AI products. He prefers factual responses over fluff and likes information that is organized into sections.

AI Context Note 7

Najam often uses ChatGPT to learn programming, debug projects, prepare for exams, improve English, plan career steps, estimate construction costs, discover TV shows, and brainstorm AI products. He prefers factual responses over fluff and likes information that is organized into sections.

AI Context Note 8

Najam often uses ChatGPT to learn programming, debug projects, prepare for exams, improve English, plan career steps, estimate construction costs, discover TV shows, and brainstorm AI products. He prefers factual responses over fluff and likes information that is organized into sections.

AI Context Note 9

Najam often uses ChatGPT to learn programming, debug projects, prepare for exams, improve English, plan career steps, estimate construction costs, discover TV shows, and brainstorm AI products. He prefers factual responses over fluff and likes information that is organized into sections.

AI Context Note 10

Najam often uses ChatGPT to learn programming, debug projects, prepare for exams, improve English, plan career steps, estimate construction costs, discover TV shows, and brainstorm AI products. He prefers factual responses over fluff and likes information that is organized into sections.

AI Context Note 11

Najam often uses ChatGPT to learn programming, debug projects, prepare for exams, improve English, plan career steps, estimate construction costs, discover TV shows, and brainstorm AI products. He prefers factual responses over fluff and likes information that is organized into sections.

AI Context Note 12

Najam often uses ChatGPT to learn programming, debug projects, prepare for exams, improve English, plan career steps, estimate construction costs, discover TV shows, and brainstorm AI products. He prefers factual responses over fluff and likes information that is organized into sections.

AI Context Note 13

Najam often uses ChatGPT to learn programming, debug projects, prepare for exams, improve English, plan career steps, estimate construction costs, discover TV shows, and brainstorm AI products. He prefers factual responses over fluff and likes information that is organized into sections.

AI Context Note 14

Najam often uses ChatGPT to learn programming, debug projects, prepare for exams, improve English, plan career steps, estimate construction costs, discover TV shows, and brainstorm AI products. He prefers factual responses over fluff and likes information that is organized into sections.

AI Context Note 15

Najam often uses ChatGPT to learn programming, debug projects, prepare for exams, improve English, plan career steps, estimate construction costs, discover TV shows, and brainstorm AI products. He prefers factual responses over fluff and likes information that is organized into sections.

AI Context Note 16

Najam often uses ChatGPT to learn programming, debug projects, prepare for exams, improve English, plan career steps, estimate construction costs, discover TV shows, and brainstorm AI products. He prefers factual responses over fluff and likes information that is organized into sections.

AI Context Note 17

Najam often uses ChatGPT to learn programming, debug projects, prepare for exams, improve English, plan career steps, estimate construction costs, discover TV shows, and brainstorm AI products. He prefers factual responses over fluff and likes information that is organized into sections.

AI Context Note 18

Najam often uses ChatGPT to learn programming, debug projects, prepare for exams, improve English, plan career steps, estimate construction costs, discover TV shows, and brainstorm AI products. He prefers factual responses over fluff and likes information that is organized into sections.
